## Spreader

SnowEx introduced the V-Maxx 9500, its largest V-box-style spreader. Featuring a 4-cubic-yard capacity hopper, the electric-powered V-Maxx 9500 is ideal for larger applications. Designed for use with larger commercial-duty pickups, flatbed trucks and dump-bed trucks, the V-Maxx 9500 features an all polyethylene-constructed material hopper that boasts the patented SnowEx Material Feed System, consisting of a multi-angle hopper design, heavy-duty auger drive, inverted-V baffle configuration and an attached vibrator.

## Sustainable plant tags

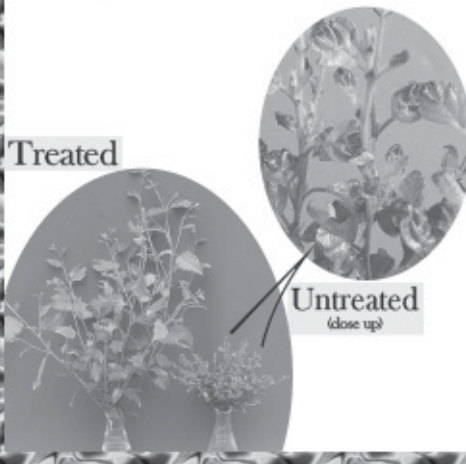

Horticultural Identification Products (HIP) introduced two sustainable plant tags. EcoTags are a degradable alternative to traditional plastic plant tags. The rigid tags maintain integrity until buried in compost or disposed of in a landfill. Tags disintegrate in one to five years. BioTags are produced using technology that relies on bio-based products, such as corn and soybeans, rather than fossil fuel-based resins. Degradation takes approximately one year.

# ATTENTION RIVER BIRCH GROWERS

Do your container trees have small malformed leaves?  
Trees not growing? ~ Spring flush not vigorous?  
**YOUR TREES MAY BE SUFFERING FROM "MOUSE EAR"**

Even mild "mouse ear" can reduce potential growth and profits. Apply **Advance Ni™** to correct mouse ear during the growing season and prevent it the following spring. **Advance Ni** provides nickel nutrition to improve nitrogen metabolism to maintain maximum growth potential of your trees.
